

MUHAMMED KILIC

Cybersecurity Consultant & Engineer · 8 Years Across Advisory, Engineering & Offensive Security
mskilic98@gmail.com · (480) 800-7650 · Phoenix, AZ · [linkedin.com/in/mkilic](https://www.linkedin.com/in/mkilic) · [kilic.tech](https://www.kilic.tech) · Open to Remote / Relocation

SUMMARY

8 years across threat intelligence, offensive security, cloud engineering, and enterprise risk advisory. At PwC, I lead cybersecurity assessments for Fortune 500 clients in financial services, energy, aerospace, and telecom: advising CISOs on cloud security architecture and regulatory compliance (NIST CSF, NIST 800-53, ISO 27001, IEC 62443). Offensive background from Intel and hands-on lab research means I assess controls as an attacker, not just an auditor. Currently building AI-native security tools including PromptWatch, an LLM red-teaming framework.

EXPERIENCE

Cyber Defense & Engineering Consultant · PwC Jul 2022 – Present · Phoenix, AZ

- Lead cybersecurity risk and control assessments for Fortune 500 clients across financial services, insurance, energy, telecom, and aerospace — aligning to NIST CSF, NIST 800-53, ISO 27001, NYDFS Part 500, and IEC 62443
- Conduct CSPM assessments across multi-account AWS environments — identifying IAM, logging, and network misconfigurations and delivering remediation roadmaps to CISO-level stakeholders
- Design and enhance controls across vulnerability management, incident detection, IAM, and logging/monitoring; lead client-facing discussions with CISOs to drive cross-functional security improvements

Cybersecurity Engineer · CYR3CON / CSW – Cyber Security Works Feb 2017 – May 2022 · Tempe, AZ

- Performed infrastructure and product security assessments including internal penetration testing and configuration audits; conducted threat intelligence research on adversary TTPs across deep/dark web sources
- Configured and secured AWS and on-premise infrastructure: IAM controls, network segmentation, logging, and endpoint hardening; developed identity lifecycle management and onboarding/offboarding procedures

Penetration Testing Intern · Intel Corporation May – Aug 2019 · Chandler, AZ

- Researched BIOS/UEFI security and performed vulnerability assessments on Intel system components; discovered vulnerabilities in military-grade firmware using Intel's internal penetration testing framework

Deskside Support Technician · Arizona State University Jan 2017 – May 2019 · Tempe, AZ

- Diagnosed and resolved hardware/software issues for ASU Engineering faculty and staff; deployed, configured, and maintained desktops, laptops, and user accounts across Windows and macOS environments
- Delivered technical guidance and cost-effective solutions to non-technical users — developing client communication skills foundational to later consulting work

PROJECTS & RESEARCH

PromptWatch · LLM Red-Teaming Framework · github.com/mkilic/promptwatch

- Red-teaming framework that fires adversarial prompts simultaneously at Claude, GPT-4o, and Gemini; a Claude judge model evaluates responses for manipulation severity and maps findings to the OWASP LLM Top 10
- Attack library covers prompt injection, jailbreaks, data exfiltration, and insecure output handling — generating pentest-style reports with per-model severity scores and refusal quality ratings

Security Research Home Lab · Adversary Simulation & Detection · 2018–Present

- VMware ESXi/Proxmox/AWS lab for adversary simulation, CTF exercises, and AI-assisted security analysis; tools include Burpsuite, Metasploit, Nessus, Wireshark, and Kali Linux

EDUCATION

B.S. Computer Science · Arizona State University – Ira A. Fulton Schools of Engineering Aug 2016 – May 2021

RSA Conference Security Scholar (2018) · Medallion Scholar · VP, PCs for Refugees · SMECA Scholarship

SKILLS & CERTIFICATIONS

Frameworks: NIST CSF · NIST 800-53 · ISO 27001 · IEC 62443 · NYDFS Part 500 · MITRE ATT&CK · OWASP LLM Top 10

Cloud & Infra: AWS (IAM, GuardDuty, Security Hub, CloudTrail, Inspector, CSPM) · Azure · Multi-account architecture

AI Security: LLM red-teaming · Prompt injection · Jailbreak analysis · Claude API · OpenAI API · Gemini API

Tools & Dev: Python · Bash · Flask · VMware ESXi · Proxmox · Kali Linux · AWS CLI

Certifications: CISSP (Sep 2026, in progress) · Azure AZ-900 (2024) · OCI Foundations (2023) · AWS SAA (renewing)

Languages: English (Native) · Turkish (Native)
