EDUCATION

Bachelor's in Computer Science Arizona State University

08/2016 - 05/2021

Tempe, AZ

WORK EXPERIENCE

Cyber Defense and Engineering Consultant PwC (PricewaterhouseCoopers)

07/2022 - Present

Phoenix, AZ

Achievements/Tasks

- Led cybersecurity risk and control assessments across financial services, insurance, energy, telecommunications, & aerospace clients, aligning programs to NIST CSF, NIST 800-53, ISO 27001, NYDFS Part 500, and IEC 62443.
- Performed cloud security posture assessments across multi-account AWS environments using CSPM tooling, identifying IAM, logging, and network misconfigurations and translating findings into remediation roadmaps.
- Designed and enhanced controls across vulnerability management, incident detection, identity & access management, and logging/monitoring programs to improve operational effectiveness and regulatory readiness.
- Conducted high-risk protocol usage analysis (SSH, RDP, Telnet) and supported implementation of role-based access governance workflows to reduce unauthorized infrastructure access.
- Led client-facing discussions with CISOs and senior stakeholders to communicate technical findings, socialize remediation strategies, and drive consensus on security improvements.

Cybersecurity Engineer CYR3CON / CSW

02/2017 - 05/2022

Tempe, AZ

Achievements/Tasks

- Performed infrastructure and product security assessments, including internal penetration testing and configuration audits, identifying exploitable weaknesses across cloud and on-prem environments.
- Installed, configured, and secured IT and AWS-based infrastructure, implementing IAM controls, network segmentation, logging configurations, and endpoint security measures.
- Developed IT and security onboarding/offboarding procedures to strengthen identity lifecycle management and reduce access control risk.
- Delivered security awareness training to staff to improve company-wide compliance and secure operational practices.

SKILLS

Cybersecurity Risk Management

Cloud Security (AWS)

Vulnerability Management & Assessment

Cybersecurity Risk Assessment & Gap Analysis

Security Assessments & Capability Reviews

Security Metrics & Executive Reporting

Cybersecurity Frameworks

Security Control Design

Stakeholder Engagement

PROJECTS

Home Lab Environment for Security Research (05/2018 - Present)

- Designed and maintained virtualized lab environment leveraging AWS, VMware ESXi, Proxmox, and Linux systems.
- Conducting adversary simulation and CTF (Capture-the-Flag) exercises to evaluate exploitation techniques, privilege escalation paths, and detection visibility across network and host-based systems.
- Exploring AI-assisted approaches to security analysis and control validation, experimenting with automation and pattern recognition techniques to enhance defensive capabilities.

CERTIFICATIONS & AWARDS

AWS Certified Solutions Architect – Associate
(2022 - 2025)

Microsoft Certified: Azure Fundamentals (2024)

RSA Conference Security Scholar (2018)

RSA Conference awards scholars from universities across the U.S. that demonstrate a strong commitment to cybersecurity, giving them access to programs that advance technical, human, and legal approaches to information security.
